

**NEW TECHNOLOGIES  
ARE GENERATING ECONOMIC  
GROWTH AND JOBS.**

## **COMMUNITY COLLEGES TEACH NEW TECHNOLOGIES.**

Solar, biotech, wind and other alternative energy technologies are the career engines for tomorrow, and are producing jobs today. Community colleges provide critical training for this highly educated workforce. Now community colleges have a critical need of their own. Enrollments are up by almost 15% nationwide, and budgets are not keeping up. Our state's economy is relying on community colleges for trained tech workers.

**Tell your state and local lawmakers to support funding for community colleges.**
